

Chart Monitor

Stock charts & comparison for Android

v2.0.0

Charts

- **Line chart** – color-coded: green when price rose, red when price fell
- **Candlestick chart** – Japanese candles with OHLC data (from 1W onwards)
- **Two-stock comparison** – percentage-normalized overlay of both prices
- **Interactive tooltip** – tap or drag to see exact price and date

Time Ranges

- Main bar: **1D** **1W** **1M** **3M** **6M** **YTD** **1Y**
- More menu: **2Y** **5Y** **Max** **Custom** (own date range)

Technical Indicators

- **MA20** 20-day moving average
- **MA50** 50-day moving average
- **MA200** 200-day moving average – available on all time ranges including 1Y/2Y
- **Trend** Linear regression across the entire chart range
- **Target** Analyst consensus price target (dashed line)
- All indicator settings persist across app restarts

Watchlist

- Add/remove stocks with one tap
- **Period performance** per entry, selectable: 1D / 1W / 1M / 3M / 6M / YTD / 1Y
- **GICS sector badge** per stock
- **Sort modes**: Manual · A–Z · Z–A · Best/Worst performance · GICS sector
- **Price alerts**: Stop-Loss and/or Target Price per stock
- **Background notifications** (WorkManager) – alerts fire even when app is closed
- Market hours: Mon–Fri 13:00–22:30 UTC
- 1-hour cooldown per symbol
